## **Cosmology Research Team**

Chris Blake (faculty)

Ryan Turner (postdoc)

Agne Semenaite (postdoc)

Sera Rauhut (graduating PhD)

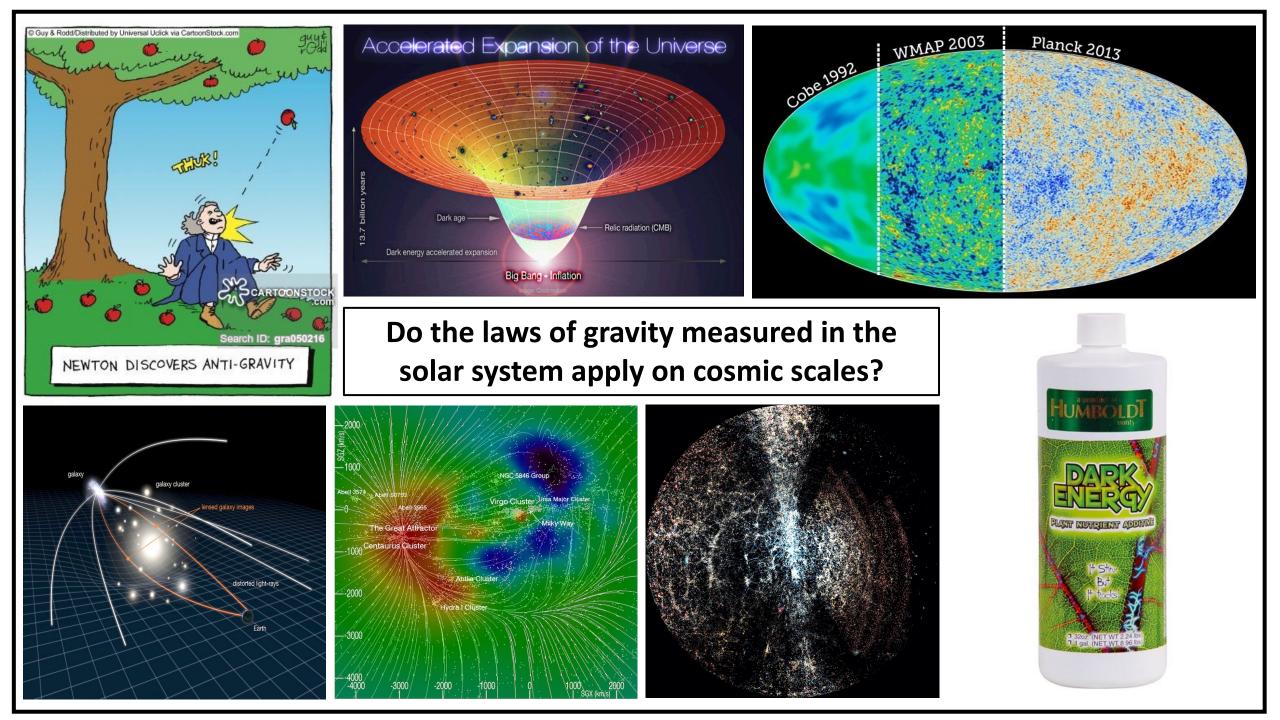

Stuart Lyall (graduating PhD)

Nimas (PhD student)

Andy Nguyen (PhD student)

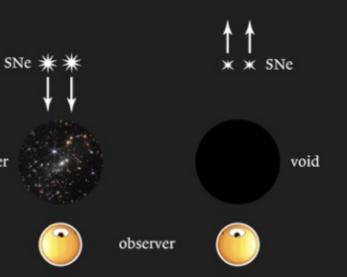

### We apply statistics to large galaxy surveys to test cosmology!

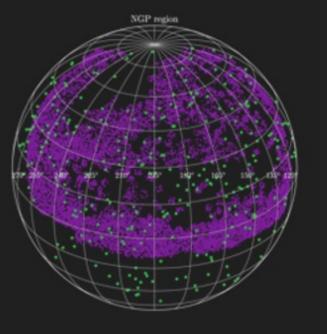

We're members of the Dark Energy Spectroscopic Instrument (DESI) collaboration, which has measured more than 30 million spectroscopic redshifts...

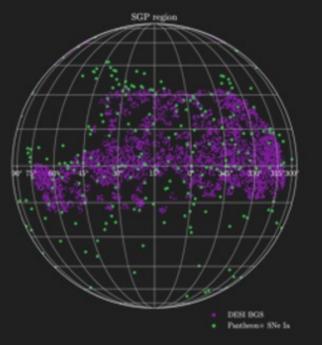

# Nimas' Fun Fact

I am from Bali. Indonesia

Ps. Bali is not a country!

I love explore new places, beaches, yoga and sunrise!

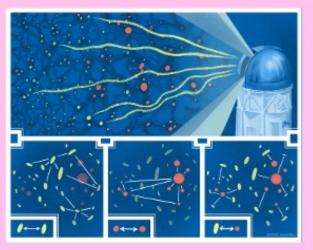

Please invite me if vou have durian!

# Project during PhD

Testing cosmology with galaxy redshift and weak lensing surveys

Unveiling Melbourne: The Metro Journey

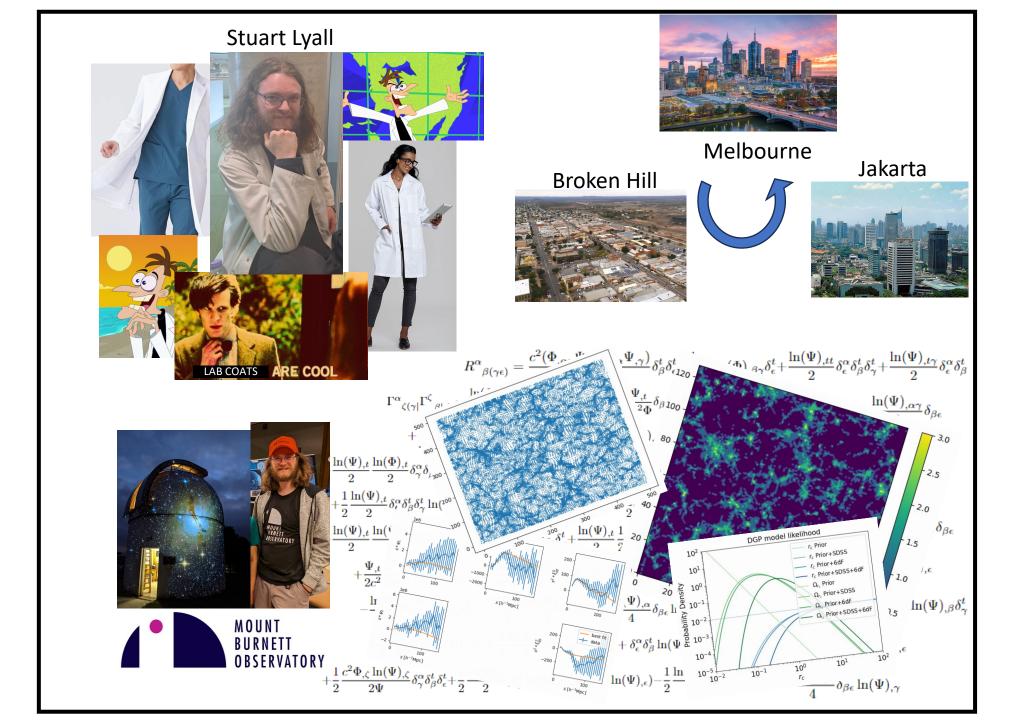

Aim: going to the end of the line on Melbourne Metro and exploring Melbourne by train.

This project is a collaboration with A, Fernandez (CAS), R. Respati (Monash U.) and D. Mulya (Unimelb).

We have finished 60% of the Metro Line. If we have time: Vline? Tram?

#### I'M OPEN FOR COLLABORATION!

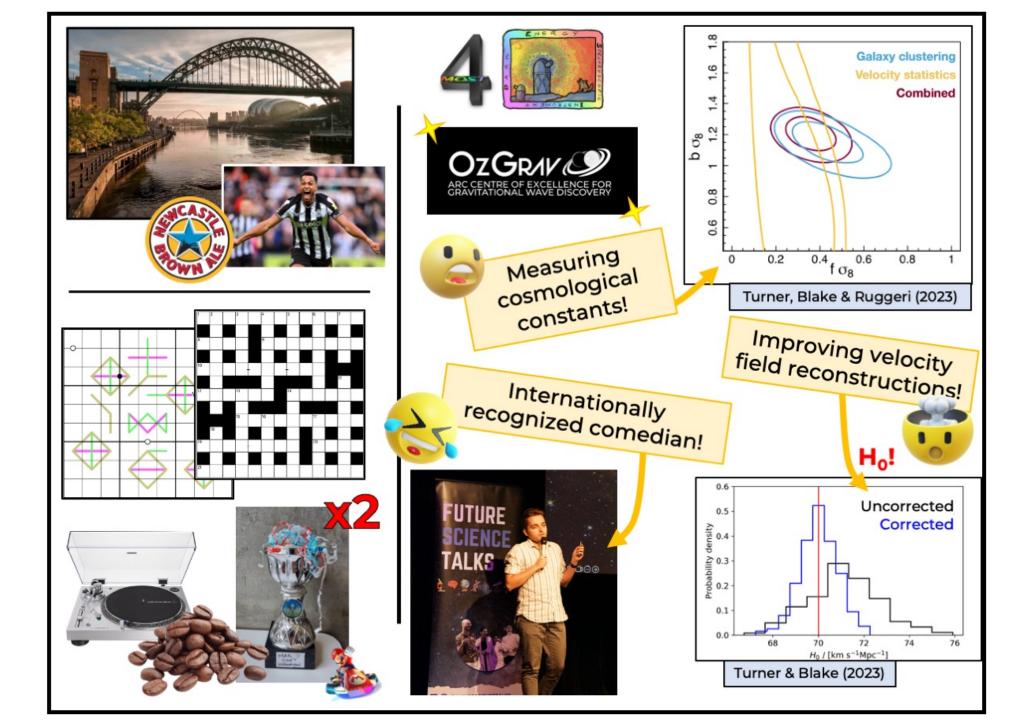

# Agnė

\* Postdoc in CAS since 2023
\* From Vilnius, Lithuania
\* Did my undergraduate in Edinburgh and PhD in Munich

**Galaxy lensing in DESI** 

#### **Personal history**

- Born in Sheffield in Yorkshire, U.K.
- Lived in Sydney and Vancouver
- Worked at Swinburne since 2006!

### **CAS roles**

- Undergraduate physics teaching
- Research in cosmology
- Now a member of OzGrav!

#### You will also find me:

- Recently starting music lessons for the first time in my life!
- At the chessboard, theatre and MCG
