

# Plan for Week 11 Computer Lab

- Please run through the “**R Laboratory 4**” document and try the examples/exercises
- We’ll learn how to use R to:
  1. Demonstrate the **central limit theorem** in action
  2. Determine the **confidence interval** for a population mean
  3. Apply **hypothesis tests** for the population mean
  4. Test whether a dataset is normally distributed
- **R Assignment 3**: Please complete the quiz by **24 October** (Friday Week 11)

*It covers Week 10/11 content and is worth 4% of the unit grade*
