# Plan for Week 9 Computer Lab
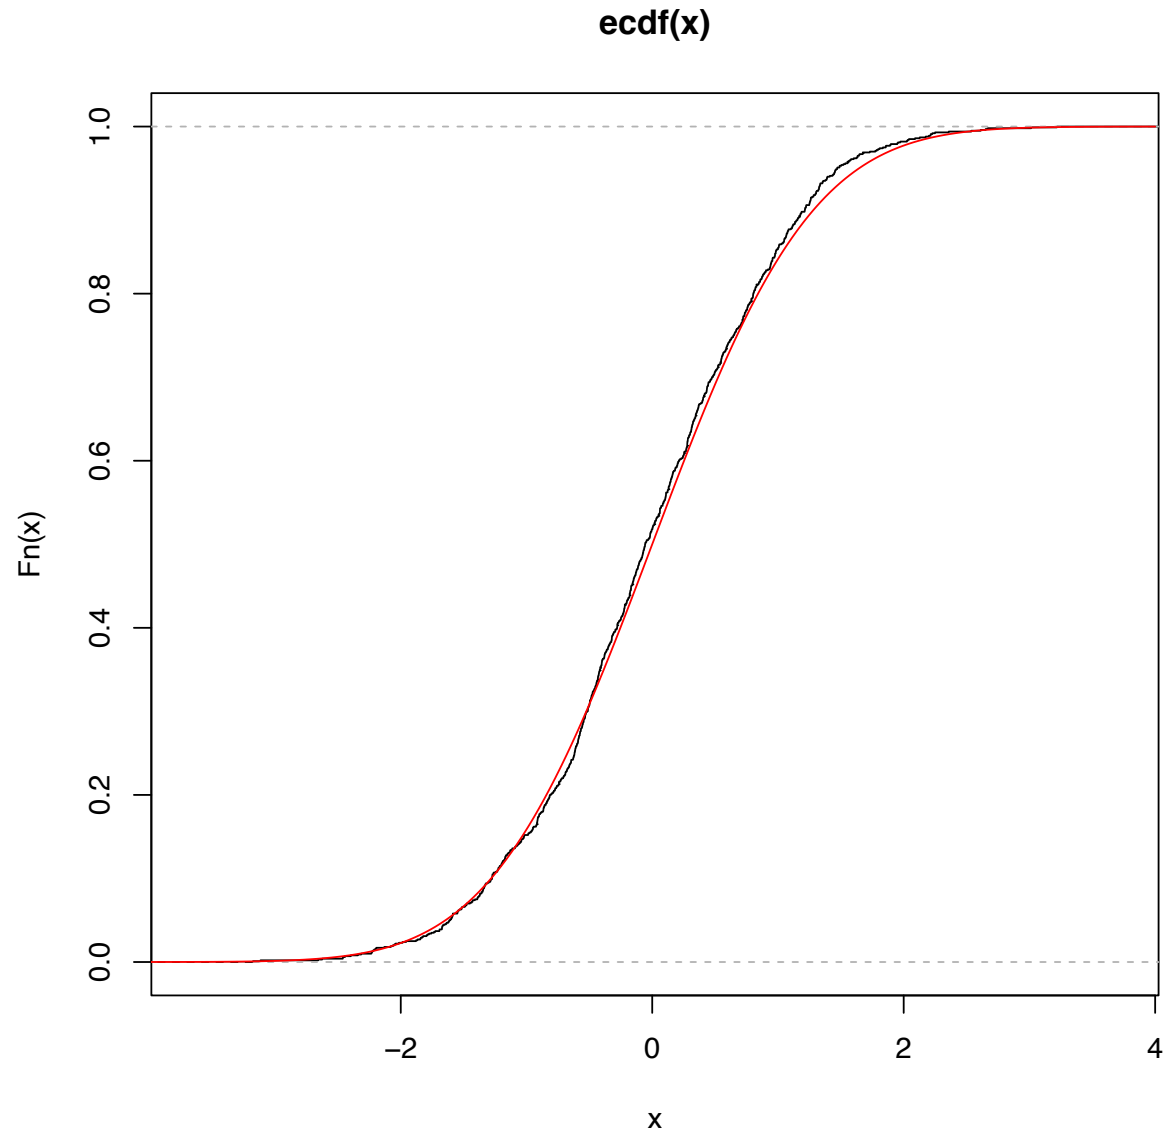

- Please run through the "**R Laboratory 2**" document and try the examples/exercises

- We'll learn how to use R to:
  1. **generate random variables** from probability distributions
  2. find **cumulative distribution functions** (cdfs)
  3. find **quantiles**
  4. compare distributions using **box plots**

- **R Assignment 1**: Please complete the quiz by **10 October** (Friday Week 9)

 *It covers Week 8/9 content and is worth 3% of the unit grade*
